EXPERIENCE

- ❖ **Frontend Engineer** | [Netrosystems](#) (May 2023 – Present)
 - Built and maintained modern, scalable single-page applications using React, Nextjs, and Vue, contributing to over 20 successful product releases.
 - Integrated RESTful APIs to display dynamic data in real-time, reducing backend load and improving response times
 - Streamlined state management using Redux and Context API, which significantly reduced unnecessary re-renders and improved overall app stability.

PROJECTS

- ❖ **SEIMS | School and Collage management system** / [smartpathshalabd.com](#)
– React, TailwindCss, Redux, Shadcn, recharts, Vite.
Built the frontend of a school and collage management system with separate panels for Super Admins and Institute Admins. Developed modules like student management, attendance, routines, and invoicing with Redux and REST API integration. Focused on clean code, role-based access, and a smooth user experience.
- ❖ **Kangabooking | Service Booking Platform** / [kangabooking.com](#)
– React, TailwindCss, Redux, Shadcn, OAuth2, Pusher.js, recharts, Vite.
Built a responsive, user-friendly frontend for a travel and accommodation booking platform using React, TailwindCSS, Redux, and REST APIs.
- ❖ **Inventory Management System | Backend** / <https://github.com/hridoyhaque01/Inventory-Backend>
– NestJS, PostgreSQL, Prisma, JWT, Redis
Built a scalable inventory management system for a single vendor using NestJS, PostgreSQL, and Redis. It handles stock, products, and orders efficiently, with secure APIs and performance-boosting features like caching and session management.
